Overall:

-Get quote button fill animation: from border to fill
-When you hover over the logo it changes to the orange version
-When you scroll begin to scroll down each of all our pages landing pages, the menu fades into the top right (and the 'get quote' button disappears) and the 'InMotion' writing in the bottom left disappears

Menu:
-hover animation like this: https://www.gifdesignstudios.com/#WorkWithUs
-when you click it does this: https://www.hongkiat.com/blog/svg-animations/
-goes to a full-screen menu like: https://www.gifdesignstudios.com/#Projects
-text on menu highlight effect like:
      -https://www.gifdesignstudios.com/#Projects (if you can take it from them)
      - just in case you aren't to take gif's here the basic version of the strike through animation https://codepen.io/tsimenis/pen/BKdENX
-all pages have a scroll to top option

Footer:

-when you highlight the text in the footer it changes to orange

Home Page:

Section 1: home page [see above]

Section 2: in house capabilities
-animated like the video we sent earlier

Section 3: portfolio
-each client section fades in as you scroll
-hover effect on each client is this: https://miketricking.github.io/bootstrap-image-hover/ (top right... hover effect 4)

Section 4:
-this section fades in as you scroll
-get quote button animation is same as the get quote button above

Section 5: testimonial
-picture of client slides in from the left while the box comes in from the right, when they arrive in their final spot, the text fades in

Services Page:

Section 1: orange line starts drawing (from left to right) then main title fades in then subtext fades in and when text is done fading in, the line should be done.

All banners:
-images slide in from left as you scroll, for each section. Once you scroll into the next banner it triggers the animation.
-number fades in first and then the text fades in as you scroll

-the banner of clients has the same hover effect as the home page portfolio section
-get quote button is same as described above

About/Team Page:

Section 1: orange line starts drawing (from left to right) then main title fades in then subtext fades in and when text is done fading in, the line should be done.

-text fades in
-pictures fade in from left to right quickly
-contact section fades in
-contact button is the same as get quote button

Portfolio:

Section 1: orange line starts drawing (from left to right) then main title fades in then subtext fades in and when text is done fading in, the line should be done.

-client boxes fade in from left to right

Contact page:

-'Contact us' fades in
-button animation is inverse from the get quote button
-address and phone # fade in
-main content boxes fade in and come down (the don't come in from the top of the page, they fade in just above where they are supposed to be, but then settle into place)

Get quote page:

-request a quote fades in
-main content boxes fade in and come down (the don't come in from the top of the page, they fade in just above where they are supposed to be, but then settle into place)

Individual service pages (all will be the same):

-main title fades in, then shortly after the subtext
-pulsing shooting down arrow button

-images slide in from closest edge and text fades in as you scroll

-the 1,2,3 banner - the text fades in

-view portfolio button same as get quote button on home page

Individual client pages (all will be the same):

-text on 'the client' and 'the work' fade in, sticky/snap scroll starts after this and all the banners (nothing fades in)
